CUAAN REVOLT IS STEADILY SPREADING

Government Officials Sanguine But Indications Point to Extension of Movement.

HAVANA; August 22.—General Rodriguez, commander of the rural guards, tonight, after reading the Incidents of the day, said to the Associated Press;
"You can tell the American people that Cuba is entirely competent to cope with the insurrection. The flood of rumors in all directions, owing to the organization of insurrectionary bands in great numbers, are not borne out by our reports, or, so far as can be learned, by the facts. The result of the encounter at San Luis is still not known definitely. The much talked of movement in Santa Clara province has not been encountered, and no

While the foregoing is typical of the utterances of government officials, there are evidences of threatening increases in the numbers of the insurrectionsts. In the province of Santa Clara the disaffection is widespread, and in the province of Havana a great many people are in sympathy with the insurgents. In some cases whole communities appear to have been carried away by the recrudescence of insurrectionary times. The extent to which this will lead to open rebellion is still uncertain.

Men Arrested in New York Charged With Counterfeiting Money to Launch Movement.

(By Associated Press.)
NEW YORK, August 22.—On a charge NEW YORK, August 22.—On a charge of making dies to counterfedt the standard silver dollar of Venezuela to finance a revolution in that country, secret service officers yesterday arrested Captain George Boynton, former resident manager of the Orinoco Corporation of Venezuela, and Lewis M. In some way Captain Boynton met Lawyer Thomson, an old acquaintance, and interested him in the revolution. The captain said he wanted to find a man who would advance \$10,000 with which to buy the silver builton for turning out the coin. To such a man the captain said the sum of \$86,000 would be returned if the movement against Castro proved suc-

cessful.

Lawyer Thomson had difficulty in interesting men of means, and inally approached some men described as sporting
men. One of these called to see Chief
Flynn and talked with him about it.
There is a Federal law protecting the

decided to investigate. Through agents
he gained the confidence of Boynton, and
to them the latter confided his plans.

When arrested yesterday afternoon Caprian Boynton was then on his way to his

The captain showed both Chief Wilkie and Chief Flynn his authorization as commissioner of the revolution. It was in Spanish and bore the signature of C. Y. Salinas, secretary-general, and the words "Diosy federacion."

Money Found.

When serached, \$5,400 in American money was found on the captain. In addition, there was also found a receipt signed by Keliar Bros., showing \$1,500 had been paid in part for eight sets of dies, hubs and devices used in milling the edges of coins.

At the same time Chief Flyn and a numbor of his men searched the Keller establishment in West Broadway, where the remainder of the dies and hubs were brought Lawyer Thomson to the secret service offices, where he and Boynton were detained all night.

In the Old Days.
"I remember very well the pride and exaltation of the people when the first side-brake engine made its appearance, which enabled the men to stand on the ground and work the brakes from either sid. The first one I remember, strange to say, was a most gergeous and beautiful affair. The box which held the water was made of posewood, as beautifully nished as a modern plane. All that apparatus was drawn by land, by men who had been awakened from sleep at their houses and came to the engine-house, I have seen one little bow-logged man struggling down Main street alone, with a hose-carriage, the wheels of which were six feet high, with a hose eight feet in diameter. Why he didn't break his neck I cannot understand, but they seemed to have the strength of a dozen men. In the Old Days.

A Work of Dignity.

'I think it in well to call attention on an obcasion of this sort to the fact that the importance and dignity of the fact that the importance and dignity of the work in which you are engaged increases daily and vearly. Although we might expect from the improvement of buildings and every other condition that the firement would sink into insignificance, yet the opposite is true, and his presence is more needed to-day in the cities of this country than ever before. The concentration of wealth and population and the enormous increase in the size of buildings, in a constant menace to this whole country, and I constantly fear, almost anticipate, the destruction of the g eatest cities in this country by the lack of proper fire protection. I make these remarks in order to call attention to the absolute necessity for any intelligent, careful and persistent study of the proper menas for combatting what we call configurations in great cities."

Is very careful about her churn. She scalds it thoroughly after using and gives it a sun bath to sweeten it. She knows that if her churn is sour it will taint the butter that is made in it. The stomach is a churn. In the stomach and digestive and nutritive tracts are performed processes which are almost exactly like the charring of butter. Is it not apparent then that if this stomach churn is foul it makes foul all which is put into it?

The evil of a foul stomach is not alone the bad taste in the month and the foul breath caused by it, but the corruption of the pure current of blood and the dissemination of disease throughout the body. Dr. Pierce's folden Medical Discovery makes the sour and foul stomach sweet. It does for the stomach what the washing and sun bath do for the churn—absolutely removes every tainting or corrupting element. In this way it cures blotches, pimples, eruptions, scrotulous swellings, sores, or open enting alleers and all humors or diseases arising from bad blood.

If you have bitter, naxy, foul taste in your mouth, chated tongue, foul breath, are weak and ensily tired, foel dopressed and despondent, have frequent beaues well and and despondent, have frequent beaues, can all, are weak and ensily tired, foel dopressed and despondent, have frequent beaues, somether risings after enting and poor, appetite, these symptoms, or any considerable number of them, indicate that you are suffering from billousness, torpid or lazy liver with the usual accompanying indigestion, or dyspepsia and their attendant deragements.

MORGAN R. MILLS, Chief Marshal L. T. CHRISTIAN, Chief of Staff Will Join Later.

The seven companies of the Richmond Fire Department that are assigned to the parade to-morrow will not be in the entire route, but will join the parade at Fifth and Broad Streets after it has been through its downtown line, as provided in the line of march. This is done to avoid this heavy apparatus having to be drawn up the steep grades.

The chief marshal and his aides will dress as follows for the parade: Black derby hat, dark sack soat, white duck trousers, black leggins or boots, black shoes, dark bow tie, tan gloves and crop, Saddles and bridles to be tan.

Ample police agrangements have been made by Chief Werner, and there will be a squad of mounted officers in lins.

People were packed and jammed all along the line, and at the City Hall there was fairly a mob in numbers, though it was orderly in demeanor.

As the various companies arrived they marched around the hall and awaited signals to pass in review before the assembled board on Broad, between Tentifiand Ninth Streets. At the sound of the gong calling them forth, men and horses alike seemed rendy to be "looked over," and they all marched up and "passed muster" amid the loudest praise.

When the inspection was over Company No. 5 held a vast throng for nearly an hour, while the magnificent engine threw a two-inch stream over the tower of the City Hall.

There were frequent outbursts of appliance as the stream would clear this high mark, and when the crowd dispersed loud praise was heard on all sides of the splendid condition and expanity of the Richmond department.
